Drums are permanently mic'd, we bring all of our own mics, stands, and cables.

All mics and instruments run into a digital snake in the rack. All IEMs are run off our mixer and we make our own mixes. Outputs 15 and 16 are a main mix of our whole show.

Laptop (tracks) runs into mixer via USB and comes out the digital snake.

All sounds come out of the digital snake and into the house system. If you would like more mics (for instance, a hi hat mic), it will have to bypass our system and go directly into your system.
